Successful Printing Starts With a Well Made Plan

Here are two ways to waste money on printing: (1) extravagant planning, and (2) impractical planning. The first uses too many colors, too expensive a paper, too large a size, etc. The second plans something that can't be manufactured successfully, and disappointing results follow.

Success in printing is largely a matter of planning it so that every dollar will count. Getting the greatest possible advertising value into a piece of printing, for the money spent,

In this way we help our customers with their printing problems. Nothing can ever replace service of this kind. And we follow it up with all promises scrupulously kept, and quality up to the highest standard.

Upon this policy the House of Childs has been building for 87 years, and we number among our customers those whose fathers and grandfathers were Childs' customers before them. Make your printing needs known to us. We will help you to make it successful.

Cabinet Relations Held Source of Profits.

Washington, D. C., Feb. 12.—[Special]—Representative Foster [Rep. O.] today challenged the right of William G. McAdoo to accept the character of law practice undertaken by him and his firm immediately after he left the Wilson administration.

Charging that Mr. McAdoo and the firm of McAdoo, Cotton & Franklin received retainers that never would have been offered them had it not been for government connections, and that these retainers amounted to more than \$1,000,000, Mr. Foster submitted that "McAdoo won't do" as a presidential candidate. He referred chiefly to the McAdoo firm's retainers by the motion picture industry and the to the McAdoo firm's retainers by the motion picture industry and the Charles W. Morse shipping interests.

"Mr. Cotton," Mr. Foster said, "had been chief counsel for the United States shipping board, a government owned concern. All of its officers had been appointed while McAdoo was a cabinet member. Mr. Cotton was in position to know, and doubtless did know, the merits and demerits of the many claims, totaling millions of dollars, filed against the government and in behalf of these shipbuilders.

Orgy of Waste Recalled.

"More than \$3,000,000,000 were appropriated for shipbuilding. Much of it was squandered. Many of these dubious claims were awaiting adjudication. The shipping board must pass on them. It was under these conditions that the firm opened its offices for clients."

Confident of Success.

"We haven't reached the halfway point yet, but we are confident of going over the top before the time limit expires.

"Our success," he said; "will not only be due to the ambition of Masons, but also to the aid of nonmembers who are subscribing for interest bearing debenturers."

Work on the building, heralded as the most magnificent Masonic structure in the world, will, it is expected,

O.W.Richardson & O. the store that's "in between"

Because our merchandise has always been noted for its excellence, and because it is lasting and beautiful, there are people in this city who, have imagined that RICHARDSON'S is beyond the reach of the average income. That isn't true.

Our prices have always been reasonable; as a matter of fact, they are based on the cost to our wholesale house and on an unusually large volume of trade. They've simply got to be reasonable. In consequence, we sell Furniture, Rugs, Carpets and Linoleums to more people of modest income than those of wealth and independence.

This store is intended for the great masses of people-for the tremendous human family that is "in between"-for the people who know good things and want good things, but who don't want to pay and can't afford to pay, foolishly high prices for something ultra-exclusive.

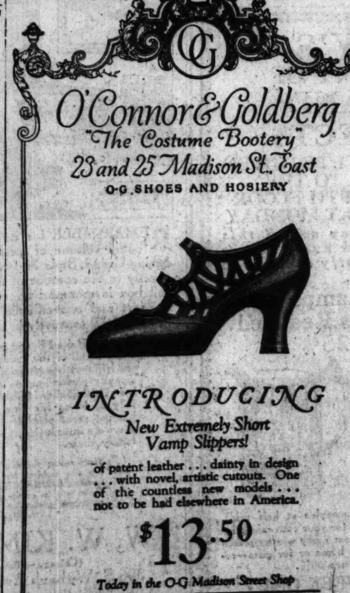

Ask about Our **Budget Plan** of Selling

It is a wise idea never to jump to conclusions. It is even a better idea to come here and look and inquire and compare. When you have done these things at RICHARDSON'S, you will know, as thousands of our steady customers know, that this store means a great deal to most of the people of this city.

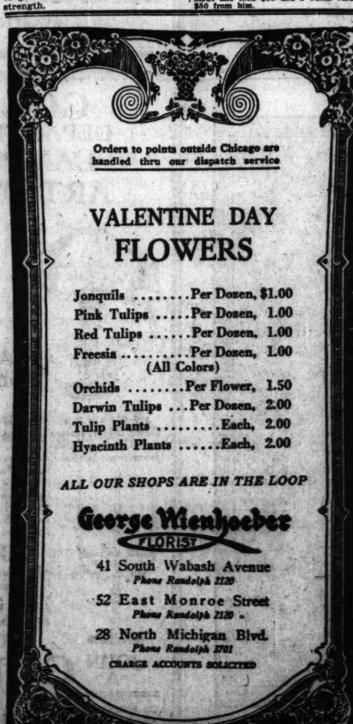

Will you come here, you folks who are "in between" and see what we have, how we operate and how very true this advertisement is?

OT long ago a story writer in his early thirties paid us a call. He said that he wanted to be an advertising man and would like to have our views. He was a gifted human being. On that score alone he was entitled to know.

It didn't take long to find out that he shared an idea about advertising which has gone the rounds for years.

Many people think advertising is a second-rate literary career which pays better than a first-rate literary career.

He grudgingly admitted some such feeling-"but had never put it just

This young man was not at fault.

Somewhere in this country right now there is another fellow who has a job in a store located in some mediumsized American town. He waits on customers. He takes his turn opening up mornings. He helps trim the windows. He writes price tickets and signs. He gets up some of the ads, when he can get a crack at 'em. He reads good books and writes a little on the side. Probably he has had three

Down at the store he gets to know whole community.

The items of merchandise as they move over the counter tell of birth, death, vanity, extravagance, thrift and

He is learning to have an affection for merchandise that will last him as long as he lives. Hundreds of human meanings begin to attach themselves to things that of themselves are just commercial goods. A new language and a new set of images are filling his imagination.

It is the merchant-mind coming into life. The mind that sees goods not merely as something at so much per package or so much per yard or so much per pair.

aristocrats.

He is living right in the middle of the great American novel every day

TO TO THE PARTY OF THE PARTY OF

Yet when this faithful and eager young man goes to New York or Chicago to make his name and fortune you won't find him writing books or stories.

You will find him doing advertising. With a good chance of becoming the greatest advertising genius in the history of the printed word.

Let there be no mistake about this: The great advertising has not been done by the literary man who has con-

descended to go into advertising work.

And the advertising classics which have been written for our American public (quite a number, by the way) have been written by men who are a special breed. Men almost always of dual mind and dual personality. On one side of the brain, the Merchant loving his merchandise. On the other side, the Writer eager to express the Merchant,

When in one person you find the Merchant-mind and the Writer-mind working as one—then you are face to face with the true advertising man in his highest and fittest sense.

As this special breed increases, advertising will become more and more of a profession with a more absolute responsibility and genius to serve.

UPPER LEVEL SIDEWALKS

The suggestion for elevated sidewalks downtow The suggestion for elevated sidewalts downtown to relieve traffic congestion, safeguard pedestrians, and increase both comfort and speed for every one traveling through the loop district, which was made by The Taibund more than a year ago and is now incorporated in our program for Calcago, has been brought to the official attention of the Western Society of Engineera. J. H. Bawyer of the municipal bureau of engineers presented the case strongly for elevated sidewalks. It will now be the subject of further scientific and economic research by the engineers.

That is a forward step. The arguments in favor of the elevated sidewalks are innumerable. Such sidewalks installed throughout the downtown dis-trict would eliminate the dangers and delays of vehicular traffic in so far as the pedestrian is con-cerned and eliminate the irritations and delays now caused to vehicles by pedestrians. A shopper could leave street car, elevated, or cab at any corner, climb the few steps to the upper level, and walk comfortably from shop to shop, from hotel to restaurant, to office building, and back, without ever another thought of dodging cars or automob or being halfed and crushed in corner traffic jame And while this safety, comfort, and speed were being provided for pedestrians the ground level would be relieved of half its present difficulties. The ground level sidewalks, unnecessary for any-thing but landing platforms, could be out back to allow at least two extra streams of vehicles on every street., Every delay now caused by crowding the surface car rider.

of loop structures would prevent construction of sidewalks at a single upper level throughout the loop. Such a walk, it is said, would be above one second floor and below the next. DID PRESIDENTS LACK VIGOR?

If the Presidents who mered more than fifty years ago, there are now very few living descendants. The physical vigor necessary to estuate the stock seems not to have among their good qualities. Where seemed to have such vigor it does not seem to have been able to withstand the results of outcrossing and bringing in new blood. Even vigorous individuals, such as W H. Harrison and John Ty-ier, the fathers of ten and fourteen children. Wars expressible for children, were responsible for sons, daughters, and grandchildren who had small families. The reputation of being the son or grandson of a President has its advantages and disadvantages. It helps and it hinders. Therefore something more than the attainment of a certain level must be taken into consideration. As the result of some investigation of the descendants of Presidents who served fifty years and more ago, one is not impressed with their superior ability as a class.

Granted that American labor has lacked the intellectual leadership that English labor has long had. Granted that they have as yet few farsighted economists among their militant workers. But can we say that the American employing class has been much richer in its supply of clear thinking economists? Has the labor class been played on by the demagogue much more than other classes of Americans?

Labor in America will have its Sidney Webb, its Bernard Shaw, and its H. G. Wells some day. Happy will America be if the other side of the controversy progresses to a leadership of that rank, too.

I grant that capital invested in indi try is necessary to the industry by which labor lives. But there is nothing inconsistent in the statement that the laborer is exploited (i. s., is compelled to labor under conditions that give the capitalist a very large share of the capitalist a very large snars of the profits of that labor) and saying that the total sum of the savings of the poorer class furnishes an enormous capital, and that the centrol of this capital gives bankers a power that is exerted in behalf of the employing class.

60% of the Middle West Motorists Use

To appreciate the full significance of that statement, take 60% of 4,855,739 motor vehicles registered in the ten Middle Western states and you get 2,913,443.

That enormous number of motorists have proved to their complete satisfaction that

is the best lubricant for them to use.

In addition there are tens of thousands of unregistered power driven machines—such as tractors, gasoline engines, etc., that use enormous quantities of Polarine.

You cannot see the quality of oil-you must take someone's else recommendation.

The Standard Oil Company (Indiana) offers you the recommendation of its board of lubricating engineers displayed in the chart on the left, and also the unspoken endorsement of two and a half faillion motorists who use Polarine regularly.

Use Polarine. Change your motor oil every 500 miles and refill with the correct grade of fresh Polarine. You will add power and life to your motor.

A Smart Business Suit Somewhat More Form-Fitting Than The Ticker Model We Recently Introduced

THE new Loop carries out in a general way the rather con-L servative lines of our previous issue. It is designed to meet the expressed wishes of business men who prefer a closer fit than is allowed by the looser drape of the current English tendency. It may be had in either the two- or the three-button style.

The Coat is slightly form-fitting and square-shouldered, with either plain or roped shoulders. The pockets, buttons, and gauge are comparatively low. The Waistcoat is plain. The Trousers are of medium width in the leg to harmonize with the lines of the coat.

IN BANDIT FIGHT IS NEAR DEATH

Ordinary Brushing will not Keep your teeth Safe

You must help the mouth glands protect your teeth . . .

INSTEAD of being washed all day by the cleansing fluids of the mouth—today our teeth are constantly immersed in an acid bath.

The mouth glands which nature intended to counteract these acids do not work properly. Our present soft diet does not give them the exercise which hard, tough foods did.

By gently stimulating the salivary glands, you can make the natural processes of the mouth counteract these acids and the teeth will be kept clean and safe all of the time.

Your mouth healthy, your teeth safe

Pebeco has a stimulating effect on the salivary glands. It makes them work in a normal, healthy fashion.

As soon as Pebeco enters the mouth, the fluids from these glands begin to flow more freely. They wash all through the mouth, neutralizing the acids as fast as they form.

Pebeco leaves your whole mouth in a healthy, live condition-your gums, your palate, the entire oral cavity.

Thousands are giving up the vain attempt to keep back the mouth acids by brushing them away. They are turning to Pebeco. They find if they keep their mouths healthy with Pebeco, they keep their teeth clean.

Pebeco is made only by Lehn & Fink, Inc. At all druggists.

Sound white teeth are important to your appearance and they directly affect your health. Pebeco leaves your whole mouth tingling with cleanliness and healthstimulating the natural cleansing process to keep your teeth safe.

An Interesting Display of Materials Together with Pictorial Review Patterns and Vogue Patterns

The "fabric's the thing" surely in this Springtime's mode. For the simple silhouette, with its svelte, grace-giving lines, is entirely dependent on materials for its best interpretation. This store's fabric sections, which have come to be regarded not only a source but also a guide and inspiration to the most successful selection, are in a fine readiness again this season.

Concerning the New Wool Fabrics— Much-favored Flannels in Variety Featuring Viyella Flannels at \$1.75 to \$5.50 Yard

That this section is ever first with fabrics in the vogue, one may see in this assortment of flannels which are having an almost universal vogue now.

Viyella flannels-fine, imported fabrics which tub perfectly and do not shrink-are here in exquisite tones, pastel tints, "high" colors, stripes, checks, barred effects and even Tartan plaids.

At \$1.75 yard-Viyella flannels in a most interesting variety of plain colors, as well as stripes, checks and small plaids. 31 inches wide.

At \$4.50 yard-Viyella flannels of a very heavy quality, in stripes and checks, in fifteen different styles to choose. 46 inches wide.

At \$4.50 yard—remarkably beautiful Viyella flannels, 54 inches wide, in "high" colors, such as rose, flame, gold, and the more subdued tones also.

At \$1.75 to \$2.25 yard—other flannel fabrics in plain and novelty weaves.

Smart Twill Cord Fabrics, \$5.50 to \$8.50 Yard

Many of these too, are in stripes and checks, and there are all the tan, beaver and brown shades, as well as gray, navy blue and black. 54 inches wide. Among others are covert-charmeen, charmenette, moire poplin, charmeen, piquetine, and novelty crepes. Priced according to kind.

The New Colorful Cotton Fabrics—Especially Exquisite Voiles and Smart Linens From the flower-like beauty of soft sheer voiles to the crisp smooth smartness of linens one goes—and finds each group in itself worthy of special consideration, all together forming assortments of out-of-the-ordinary interest.

Imported "Drop Thread" Voiles at \$1.50 Yard

PICTORIAL REVIEW **PATTERNS**

Women have come to know "Pictorial Review" patterns for the authenticity of the styles and the attractive manner they are presented. So that the favor of these patterns is great.

Their Unique Feature - A Cutting Guide-Makes Possible a Saving in Material And Directs with Simplicity and Accuracy the Use of These Patterns.

This guide is printed on the back of each pattern. Real understanding of the homedressmakers' needs has gone into its construction.

Just now, with a new fashion season ahead, the new "Spring Quarterly," introducing the spring styles for 1924, is decidedly important.

Vogue-Royal Patterns for Spring Are at New Prices

Vogue patterns have heretofore been priced at \$1 or 65c. Now, Vogue offers you an additional group of her newest designs at the new prices of 65c and 40c.

Patterns for three-piece suits and evening gowns, however, remain at \$1.

Spring modes are more becoming, more youthfully simple than ever. And notably easy to make at home. When you choose your Vogue-Royal patterns you call into service the expert designers of Paris. Your frocks, your suits, even your coats may have the smartness and distinction that is attained by clever-fingered Parisian modistes.

These new patterns are on sale at our pattern section, now conveniently located near the fabric sections on the second floor.

Don't fail to see the new Vogue-Royal Patterns for spring. On this may depend the success of your summer wardrobe.

The Pattern Section Is Close to the Fabric Sections-Women Will Immediately Realize the Advantage of This. For They May Choose Fabrics in Relation to Patterns Quickly, Conveniently and with Fine Success.

She did not comment, for ahe remembered that meeting on Trout portage. Cron must have seen the doubt in her eyes, for he laughed harshly. "You know it. You're the kind that sees things. Roddy'll try. I'm not expecting too much of his hating me. But I'm expecting he'll be like his did. He'll turn tricky, do anything to win, which will only make it last a little longer."

Marian was too troubled to see a quick gleam in his eyes when she remained silent. Her first estimate of the man, formed largely by her emotional reactions, blinded her to the motives or subtlety in his baiting, and cance, drove her to denial. But this time she strove to keep all vehemence from her voice.

"I won't believe that of Rod," she said.

"'I am right glad to catch this good occasion."

Marian started, but forced a quick smile. That is not scripture," she retorted. Nor is there anything in scripture to forbid homage to beauty," he anwered. "Please do not mistake me," as Marian's eyes chilled. "Only it has upon my mind that I have a duty. We men of the wilderness see so much that is ugly and rough it is only right that I should express for myself and

"That is a pretty speech." and Marian blushed more for the man than for herself. There was something so humble about him her pity was aroused, but she could not refrain from banter. "I don't wonder the Indians flock to

The photoplay is in two parts. Both parts would show that one must keep the ten commandments or go to the devil. So far as the layman will see, there's no reason why there should not have been two distinct films instead of one film in two parts. Moses leading the Israelites out of bondage, which is the first half, could be one. The melodrama which is the second part, and which is only relieved from being an ordinary melodrama (to my way of thinking by the unexpectedly magnificent work of Rod La Rocque, and the clever acting of the people supporting him, who, by the way, rarely do any acting that ISN'T clever, could be another.

Visualizing the picture the morning after, this Chicago boy's work stands out as the one big, vivid, impressive thing about the whole. It is like a brilliant, exquisitely cut diamond set in a huge brooch of varicolored stones, displayed, say, amid the clangor of State and Madison streets. Once your attention is called to the central stone you forget those about it and are impervious to din and thing of the poetical im a death scene.

Yet it was thus fated. It was not that the concert became any the less pleasant because its artistic values were shifted from their programmed announcement; merely that when so delightful a singer as Miss Dux appeara, she is more than a little likely to take the leading position.

She sang much and frequently, songs of the ancients, modern lieder, English songs, an aria or two, and, once the audience had decided on her being the personality she is, many encores. Few are the singers able to put as much charm into a lied as she, or for

Perhaps one reason that Miss Dux took first place in the concert is that she had more good songs than the chorus. The most important choral work on the program was the prize winning setting of James McLeod's "The Sea," by Franz C. Bornschein of Baltimore. It is an excellent effort, the more so because the poem is a difficult one to set. Its mood is expressed by contrasting and opposed words and phrases, making necessary a like opposition of musical mood. Mr. his mind, as, to Bernard Granyllie's part of the Playhouse, thinks that Mr. Gilpin here two years ago in "The Einspirce Jones," for the part of the Playhouse, thinks that Mr. Gilpin would be all right, but is dublous as to the others, and asks the bookers to send something else.

As to "Around in Par," which he announced last week for performance on March 2 in the Playhouse, thinks that Mr. Gilpin would be all right, but is dublous as to the others, and asks the bookers to send something else.

Possibly the dyed in the wool gallus wearer; if confronted with one of the giddy blue and yellow, or red, orange and black striped suspender affected by the collegian and the well dressed man today, would put it aside as a work of the devil.

Now some daring manufacturer has put on the magket a novelty in the line of suspenders that may rock the nation to its foundation. In place of the elastic jiegers shaped like an inverted V to which the trouser buttons are fastened, there is a bright steel chain with thingamajigs on the end to fasten to the button.

The makers claim that the chain, aliding freely through the loop of the suspender, gives more readily with the motion of the body, and that there is practically no binding. equal rights bill, the letter pointed out, would take away woman's protective legislation.

For instance, the women reminded the committee, there is that matter of the chair. In Illinois there is a law compelling department store employers to provide chairs behind the counters for all women employed. There is no such provision for the men. Men employés either stand or swipe a chair from one of the women.

from one of the women.

But with the passage of the proposed amendment and blanket Squality foreibly legislated upon both sexes the chair, many Chicago women fear, will be swept away. And they don't want to stand for that.

This theory is all wrong, according to Miss Rebeces Hourwich, organizer of the National Woman's party, who yesterday discussed the relativity of chairs and constitutional amendments from the party's midwestern headquarters in the Auditables of the Auditables.

The proposed equal rights bill, Miss Hourwich said, will not do away with chairs. On the contrary, it may increase their number.

For instance, she recalled, there's the case in Florida. In 1910 the state passed a law providing chairs for all persons clerking behind counters. A person, she made it perfectly clear, is not a woman, nor yet a man. It's a person. So everybody sits down in Florida.

This is only one of the many ways in which the wear of "U. S." Rubbers and Arctics is actually measured and tested before they leave the factory.

These tests insure the high quality which has made "U.S." Rubbers and Arctics the recognized standard of value today. They are the reason why so many people are finding that it pays to insist on "U. S." brand whenever they buy rubbers or arctics.

They cost no more and last longer. It will pay you to look for the "U.S." trade mark.

COFFEE and the Chicago World's Fair-1893

Possibly you or one of your family visited the World's Fair at Chicago in 1893.

One product particularly American was demonstrated there in a practical enective way. Whoever drank coffee at any restaurant or cafe tasted the excellence of Chase & Sanborn's Seal Brand Coffee.

Seal Brand was then, and continues to be, particularly American. It was good coffee-it represented the most popular American blend and roast-it was used by discerning coffee drinkers all over the country. In fact it was an American institution.

To-day its popularity is still greater and it is gaining every year.

Seal Brand Coffee is sold in sealed tin cans never in bulk.

the shot? When and how is this done? I get poor distance on all of my shots.

ANSWER.—Putting wrist action into a stroke means that the action of the joints is applied to speeding up the club head just before it reaches the ball Maybe I can explain it so you will understand. Place your hands together down in front of the body in the position they would occupy in gripping a club grounded immediately back of the ball. When the club is taken back and the hands reach the top position, the right hand bends back somewhat at the wrist, and both bend in toward the body. From there they begin the downswing.

On the way down, the hands should keep this same position with reference to the content and international problems and international problems and international problems and international problems are identically appear of Japan has been delegated to seems highly distinct the same been delegated to seems highly and the second for the promoters of this very point of the promoters of this very point, will encounter her first test of the promoters of this very point of the promoters of this very point, will encounter her first test of the promoters of this very point, and the same promoters of the very promoters of the section into a square for the promoters of this very point, and the same promoters of the very promoters of the section in the paper of the promoters of the unit of the section in the logical promoters of the section in the paper of the promoters of this very point, and the section in the logical promoters of the promoters of this very point, will encounter her first test of the promoters of the unit of the

Bay Cannon, attorney for Jackson, broke the ensuing silence with the advice to Felsch "If it's your signature, Hapty, say so." Again he denied it. Judge Gregory summoned Attorneys Huthail and Cannon to his tench for a whispered conference of more than five minutes, and announced curtly, "This case is adjourned until 10 o'clock tomorrow morning," and left the bench.

The contract which Felsch denied having signed is alleged by the White Sox officials to be the one he played under for nearly the entire season of 1920 and on which he is suing the White Sox owners for unpaid salary of that year, the salary he claims due him from the day of his suspension, because of suspected complicity in the 1919 baseball scandal, and the end of the regular 1920 season.

Old Roman Describes Confession.

Charles A. Comiskey was on the stand before the Felsch occurrence. His voice shook in deep emotion as he related the story of the tense moment at the White Sox baseball park in September, 1920, when Eddie Clootte, one of his pitchers, confessed his part in the world's series scandal of 1919, and named seven other players as jointly implicated.

"The old Roman "described Clootte's alleged confession as "pitiful." He alleged confes

Felsch was a rebuttal witness for Joe Jackson. To counteract the testimony of Harry Grabiner that he did not own a fountain pen and had not signed Jackson to a 1920 contract with a fountain pen, Felsch testified that Grabiner signed him to a 1920 contract in his home here, pulling a fountain pen out of his pocket.

In cross-examination by Attorney Hudnall for Charles Comiskey, owner of the Chicago White Sox, a few minutes later, Felsch was shown the 1929 contract for identification of his signature, and denied with emphasis that it was his signature he was looking at Denies Knowledge of Letters.

Just before this incident Mr. Hud nall was showing Felsch a number of letters that had passed between him and Comiskey, knowledge and identity of which Felsch denied, and Mr. Hudnall then pushed the 1920 contract before him. Felsch, with a wave of his hand, denied that the signature on it was his.

By his own testimony today he has voided this suit, said Attorney Hudnall after court adjourned, because he declared virtually that no such con-

The handwriting in the contract also indicated, according to the witness opinion, that there had been no awkwardness of position of the writer when the contract was filled in. The testimony of Jackson earlier in the trial was that the contract had been drafted on the top of a door of an automobile, whereas Grabiner yesterday stated on the stand the contract was executed, signed, and delivered in the Jackson residence in Savannah early in 1920.

LEGAL INVESTMENT FOR MICHIGAN SAVINGS BANKS UNDER EXISTING STATUTES

The following salient facts concerning this bond issue are taken from a letter signed jointly by Mr. E. B. Clark, President, and Mr. Moritz Thomsen, Vice-President of the Company:

BUSINESS: The Thomsen & Clark Timber Company, Limited, owns large tracts of Crown Grant (fee title) timber lands located in the vicinity of Horne Lake on Vancouver Island, British Columbia. The Company is now engaged in logging this property and has over seven miles of logging railroad extending from its logging operations to its protected booming grounds at Deep Bay, about 60 miles from Vancouver. No logs are sawed by the Company but are sold in the Vancouver, B. C., and Puget Sound, Washington, log markets. The Company has valuable contracts for over 100,000,000 feet of adjacent standing timber.

SECURITY: This issue of bonds will be secured by a direct first (closed) mortgage upon all the fixed assets of the Company, including 18,537 acres of Crown Grant timber lands, estimated by James D. Lacey & Co. to carry over 742,000,000 feet of merchantable timber, and valued by them at \$2,003,894.50, and railroad right-of-way and logging equipment having a present value of \$344,471.82. There is reserved from the proceeds of this bond issue the sum of \$370,000 which is to be expended for equipment, railroad and permanent improvements, all of which will be similarly placed under this mortgage. The fixed security will thereupon amount to \$2,718,366.32, or over \$2,718 for each \$1,000 bond of this issue.

The balance sheet shows net tangible assets, after deducting all other liabilities, of \$3,720,074.76, or \$3,720 per \$1,000 bond.

PURPOSE OF ISSUE: The proceeds of this issue are to be used for the purchase of additional timber and equipment, extension of the railroad and the retire-

SINKING FUND: The Company ovenants to deposit with the Trustee each three months for the creation of a Sinking Fund, the sum of \$3.00 per thousand feet for all timber cut and removed from the lands covered by the mortgage, and \$1.00 per thousand feet as cut from the lands no controlled by contract. These moneys are to be used solely for the calling and retirement of the bonds of this issue. Based upon the present operating program of the Company, this entire issue of bonds will be retired several years before maturity.

GUARANTEE: These bonds will be unconditionally guaranteed as to principal and interest by Moritz Thomsen and E. B. Clark, both of Seattle, Washington, who are the principal stockholders of the Corporation. These men have long been prominent in business and banking circles in the Northwest, and make a statement of net worth of over \$1,500,000 outside their investment in this Company.

These bonds are offered for delivery when, as and if issued and received by us, and subject to approval of counsel.

York City has been considerably restricted, thereby placing a special premium on such property as this.

The building we offer is in one unit, varying in height from one to seven stories. It is of heavy mill construction, occupying an entire block with frontage on four streets.

In the past it was used in the manufacture of heavy machinery. It is emi-

Hazeltine Corporation ORGANIZED UNDER THE LAWS OF DELAWARE "NEUTRODYNE"

CAPITALIZATION

This corporation will be the sole, exclusive owner of the trade-marks "Neutrodyne" "Neutrodon" and "Neutroformer" and of United States Letters Patent covering Professor L. A. Hazeltine's well-known developments in the radio industry which have resulted in the production of the "Neutrodyne" Receiver.

BUSINESS: We are informed that there are being produced at the present time more "Neutrodyne" Receivers than any other type of radio receiver. The Independent Radio Manufacturers, Inc. (I. R. M.) have acquired exclusive rights to manufacture and to sub-license their stockholder members to manufacture and sell "Neutrodyne" Receivers, "Neutrodon" Condensers, and "Neutroformer" Coils, and will pay royalty to the Hazeltine Corporation when its organization is completed based on a fixed percentage of their net sales value of equipment so produced.

We are advised that the following are among the sub-licensees of the Independent Radio Manufacturers, Inc., and may lawfully manufacture and sell "Neutrodyne" receiving sets or parts thereof:

American Radio & Research Corp.

F. A. D. Andrea, Inc.

Broadcast Manufacturers, Inc.

Carloyd Electric & Radio Co., Inc.

Eagle Radio Company

Stromberg-Carlson Tel. Mfg. Co.

R. E. Thompson Mfg. Co.

Ware Radio, Inc.

Workrite Manufacturing Co.

PRODUCT: The "Neutrodyne" Receiver is so well-known to the public that a discussion of the merits of this development is unnecessary. The simplicity and fundamental character of the parts and arrangement of the circuit of a "Neutrodyne" Receiver leads to the conclusion by the engineers and scientists consulted by us in the matter that it is very improbable any radical development will make possible a receiving set as inexpensive, simple and also as efficient in operation as that which the "Neutrodyne" Receiver manufacturers are licensed to make and sell.

The Independent Radio Manufacturers undertake to prosecute and defend actions in which the "Neutro-dyne" Receiver may be involved. The trade-marks "Neutrodyne" "Neutrodon" and "Neutroformer" are regis-tered and cannot be used by any excepting authorized Licensees.

EARNINGS: The commercial production of "Neutrodyne" Receivers began in the summer of 1923 and has increased at a rapid rate. Five of the manufacturers were in substantial commercial production on January 1, 1924 from which date royalties will accruete this corporation. Partly estimated figures of production for January indicate earnings at a rate equivalent to \$3.00 per share per year on the stock it is proposed to issue. The estimate for January was based on actual sales in that month for four of the five manufacturers referred to, as ascertained by our auditors, Messrs. Price, Waterhouse & Company, and the output of the fifth has been estimated. The Licensees inform us that production for January has been limited only by manufacturing facilities and it is their expectation that February will show a large increase of sales over those in January, and in addition other Licensees will be coming into commercial operation.

The manufacturer whose production has been estimated above has protested royalty payments and it seems possible this controversy may have to be settled in court. All royalties from all other manufacturers have been

While the above figures indicate gross revenue, the expenses of the corporation as contemplated will be nominal. The corporation, however, will lend its entire support and full cooperation to the Independent Radio Manufacturers, Inc.

The growth and development of the "Neutrodyne" Receiver business, both as to rapidity and magnitude, is probably without precedent in American industry. In a few short months this business has grown from nothing to its present size. It should also be borne in mind that the demand resulting in such unusual growth has originated practically entirely in the United States. This corporation also owns important rights in foreign countries where it seems proper to anticipate that a demand for this successful American development should be evident in the near future.

CONTINGENCIES: There is, of course, possibility of unforeseen radical developments and improvements which might supersede "Neutrodyne". It is impossible to forecast the trend of inventions and developments in the radio art, but it is the opinion of eminent scientists that we have consulted that it is extremely unlikely that future inventions will render unnecessary the use of the principles embodied in the "Neutrodyne" Receives in order to obtain efficient, simple, inexpensive apparatus.

At the present time there have been instigated a number of offensive actions against infringers of the "Neutrodyne" patent and trade-mark rights. The I. R. M. have been called upon to defend a case brought by the Radio Corporation, the General Electric Company, the Westinghouse Company and the American Tel. & Tel. Company against one of its Licensees for alleged infringement of two patents owned by these associated companies. In the opinion of patent counsel, Messrs. Pennie, Davis, Marvin & Edmonds, New York City, acting for the I. R. M. and the individual defendant, there is believed to be a good and valid defense to this action.

These shares are aftered when, as and if issued and accepted by us, and subject to approved of the formulates incident to their issue by an annual, Masses Douglas, Armitage & McCann. New York City.
